Formmative patient safety module
IMP-204--Phase: I
2nd year,Semester 4
Girls
2022

.1 *

.2 *

2021580

.3 * To improves surgical safety, All the following are true EXCEPT:
(1)

A. Before skin incision, be sure that, has antibiotic prophylaxis been given within the last 60 minutes?

B. Confirm all team members have introduced themselves by name and role before skin incision.

C. Before patient leaves operating room, be sure that patient consent was obtained.

D. Nurse verbally confirms with the team that instruments, sponge and needles counts are correct, before patient leaves operating room

.4 * If the patient has a question about his care, what's the best thing he can do?
(1)

.A. Research it on the Internet

.B. Ignore it and trust everything will work out

.C. Speak up and ask his health care provider

.D. Ask a friend or family member to find the answer

* Doing the wrong thing when meaning to do the right thing." Is a simple definition of .5
(1)

Error (

b) problem

c) incidence

d) Inexperience

* Indian female, 20 years old, came to Egypt as a tourist. She .6
suffered from abdominal pain and she has been admitted to the
hospital. Doctor try to ask about past medical history or if she
.take any medication but fail to obtain any information
?What factors likely contributed to this adverse patient event
(1)

A. Poor working conditions and fatigue

B. Limited memory capacity

C. language factors defect

D. cultural factors defect

* :Incident open-disclosure process should be .7
(1)

A. Shared by patient relative

B. Recognize and achieve the expectations of the patient

C. Documented and end the process totally

D. Explore emotions and deliver empathy

* Near miss should be .8
(1)

.a- reported with in 24hrs of working days

b- Not reported as no harm to patient occur

.c- reported immediately

d- reported with in 2 hrs of working days

An event or circumstance where the incident did not result in harm, loss or damage, but .9
could have, this is referred to as
*
(1)

a- Near Miss

b- Adverse Events

c- Never Event

d- Sentinal Events

* Sentinal Events should be .10
(1)

.a- reported with in 24hrs of working days

b- Not reported as no harm to patient occur

.c- reported immediately

d- reported within 2 hrs

11. A form that is filled out in order to record details of an unusual event that occurs at the facility, such as an injury to a patient. *
(1)

a- Incident report

b- Collecting report

c- Never event

d- Sentinal Events

12. Healthcare safety culture : *
(1)

a- medical staff only

b- developed performance only

c- improvement measures surrounding safety outcomes only

d- all of above

13. The importance of Healthcare safety culture is to *
(1)

a- reduced patient harm

b- increase Healthcare facilities

c- decrease Healthcare cost

d- increase Healthcare outcome

14. Hand Hygiene is a vital part of Infection Control because: *
(1)

A. The most common mode of transmission of germs is via hands.

B. There is an increase in the number of infections acquired in health care.

C. Anti-microbial resistance is increasing

D. All of the above

15. When is hand hygiene necessary? *
(1)

A. After caring for a patient with CDIFF

B. At the start of your shift

C. After your lunch break

D. All the above

E. Only a and b

16. Alcohol that is used on the skin is a type of? *
(1)

A. Antiseptic

B. Herbicide

C. Skin culture

D. Disinfectant

17. Healthcare professionals can take the following steps to protect patients from drug-resistant infections except. *

(1)

- a- Prescribe Antibiotics for any infections.
- b- Educate Your Patients
- c- Wash Your Hands
- d- Get Vaccinated

18. About Learning of your patients the right ways to use antibiotics all of the following true except *

(1)

- a- Not all infections need antibiotics.
- b- Work with your healthcare professional to make sure you are getting the right antibiotic, at the right dosage, for the right amount of time.
- c- Never demand antibiotics if your healthcare professional says they are unnecessary.
- d- The best antibiotics are the expensive one.

19. The FDA assigns the letters A, B, C, D, and X to drugs approved for human use. To which of the following does this classification apply? *

(1)

- A. Amount of dosage reduction needed as serum creatinine clearances fall
- B. Fetal risk when given to pregnant women
- C. Amount of dosage reduction needed in presence of liver dysfunction
- D. Relative margins of safety/therapeutic index

E. The number of unlabeled uses for a drug

.20 * Type B of adverse drug reactions is characterized by
(1)

A. Dose-dependent

B. High incidence

C. Predictable

D. Need to stop the drug

.21 * :All the following are regard patient safety are true EXCEPT
(1)

a. Patient safety can be defined as absence of preventable harm to a patient during the .process of health care

b. Perioperative mortality still remains ten times higher in low and middle-income .countries than in high-income countries

.c. Complications after inpatient operations occur in up to 25% of patients

d. At least half of the cases in which surgery led to harm are considered to be .preventable

.22 The main types of adverse events associated with invasive procedural and surgical :care
*
(1)

.a. Poor infection control methods

.b. Inadequate patient management

c. Failure by health-care providers to communicate effectively before, during and after operative procedures

.d. All of the above

* :Surgical mortality and morbidity meetings should fulfill the following criteria EXCEPT .23
(1)

?a. Is the meeting structured

?b. Is prevention the goal of the discussion

?c. Is everyone involved except juniors

?d. Is a written summary of the discussion kept

* :The following has positive effect in patient safety except .24
(1)

a) Proper team communications

b) Situation awareness

c) Inadequate work environment

d) Safety tools

* Impact of aged patient is characterized by the .25
:following except
(1)

a- Di cult to specify its onset

b- Can be delayed

c- Can be reversed

d- Cannot be stopped

* Environmental factors that prevent parasitic diseases .26
:include the following EXCEPT
(1)

a- Safe water

b- Sanitary waste disposal

c- Adequate ventilation

d- Food sanitation

e- Eradication of vectors and rodents

* :The most di cult mode of transmission to prevent is .27
(1)

.a) Person-to-person spread

.b) Vector spread

.c) Airborne spread

d) Contact spread
